Each game in the FINAL round is played in the format of 2 periods of 18 minutes per period:

- between the periods is a 2 minutes break

Equal results:

If two teams end up with the equal result

- the team with the most number of points
- mutual result
- goal difference during the tournament
- the team with the most goals scored during the tournament
- the team with the least number of penalty minutes has a preference
- the team with the least number of misconduct penalty minutes has a preference
- the team scored first in a mutual game.

If three and more teams end up with draw results, a new sub-group is made by considering the results of the games the teams had between one another. The process continues until a place in the sup-group is determined for the teams by considering the following sub-articles (in case two teams remain with a draw result the first article of these rules is taken into consideration).

- the teams are rounded up according to their accumulated points,
- if three or more teams have the same amount of points, the goal ratio is taken into consideration only between teams whose places have not yet been determined
- if the goal ratio between three or more teams is a draw, the amount of goals is taken into consideration only between the teams whose places have not yet been determined,
- if the amount of goals is the same between three or more teams, the goal ratio is taken into consideration between all the played against teams in the tournament,
- if the total goal ratio for three or more teams is equal with all the other teams of the group, the total amount of accumulated goals is taken into consideration among all the played against teams of the group,
- if the total amount of goals is equal for three or more teams, the organizer of the tournament draws lots in front of the representatives of both teams in order to determine the place in the sub-group.
